TriMark's single key system, **KeyOne™ Plus** is designed to give a high level of security utilizing a common key cylinder across a wide range of system components.

The reversible key is offered with single and multiple codes. Where multiple codes are used, a master key is available for workshop and field servicing. Customizing or branding of the key can be offered by over-molding the key head to your design.

Key cylinders can be supplied pre-installed by TriMark or fitted by the vehicle manufacturer at any stage on the production line.

This means inventory can be reduced by stocking components without key cylinders which can be added later to the customer's specific needs.

锁芯可以在稍后的阶段进行安装，无形之中减少您零部件的库存。
