

Compression Latches

May be the solution you are seeking!

TriMark Corporation

TriMark has 'off the shelf' Compression Latches that are designed to provide consistent gasket compression for vibration dampening and elimination of rattle and noise. Models range from light duty panel latches up to heavy duty latches designed and tested for demanding work environments and high vibrational loads. They come in various styles, hand, tool or key actuation and duty ranges that will stand up to harsh environments and vibration and meet stringent requirements for sealing, noise and airflow management.

Access to Excellence

080-0500 Grapple Compression Latch

This Grapple Compression Latch is designed for compartments, access panels and hoods for off-highway vehicle applications that are subject to high vibration loads. Offering 5mm of compression, the 3 robust opposing jaws work with a striker diameter of 9.5mm, providing a high level of resistance to vibration, shock and wear.

080-0550 Downsized Grapple Compression Latch

Similar in function to TriMark's proven 080-0500 Grapple Style Compression Latch, this new product offers a space saving design that is retrofittable to popular competitor latches. Offering 5mm of compression, its use in gasketed applications meets requirements for environmental sealing, noise and airflow management, helping to reduce or eliminate noise and rattle caused by vibration.

080-0400 CompOne Compression Lock

TriMark's 080-0400 CompOne Compression Lock combines the compactness of a cam lock with smooth and secure pull-in functionality. Featuring 5mm of compression with a 180 degree turn of the key or tool drive, this robust lock is intended for gasketed doors, is fully adjustable, water resistant and easy to install.

080-0200 Compression Latch

This Compression Latch is designed for light to medium duty compartment doors, access panels and hoods for off-highway vehicle applications. This heavy-duty lever action fixed grip compression latch offers a long lever handle for increased door closing leverage, simplicity of operation and comfortable grip.

We invite you to check us out and see why TriMark is the leading global door solution provider offering **Global Reach**, **Global Support** and **Global Supply** of access door systems.

Compression Latch Solutions

If you need a Compression latch that is robust, stands up to harsh activities and vibration and will also meet requirements for environmental sealing, noise and air flow management then TriMark's proven line of compression latches can provide your best-case solution.

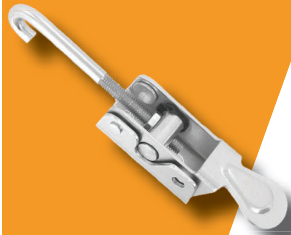

080-7100 Over-Center Latch

This simple, low-cost over-center latch utilizes a curved latch spring to keep panels tight and rattle free. Designed with no metallic parts, it reduces weight and provides corrosion resistance over steel counterparts. The quick-release locking pin can also be replaced with a padlock, for additional security.

080-5600 Compression Hook Latch

This simple lever operated Compression Hook Latch provides a secure over-center action and the spring-loaded eye-hook incorporates tension to keep panels rattle free and secure. Designed for applications where the latch and keeper are surface mounted on the same plane, folding the robust lever down pulls mating in-line panels tight.

080-5700 Compression Hook Latch Light Duty

This cost effective, light duty lever operated Compression Hook Latch provides a secure over-center action to keep panels rattle free and secure. Designed for applications where the latch and keeper are surface mounted on the same plane, folding the handle lever down pulls mating in-line panels tight.
