Edition 26 June 2024

TriMark Europe, United Kingdom - June 2024 — TriMark Europe will be exhibiting at Eurosatory 2024, the global event for defense and security, which takes place on the 17th-21st of June at Paris Nord Villepinte Exhibition Centre. The event is expected to bring together 62,000 visitors from 150 countries and 1,750 exhibitors.

Vist us in Hall 5b Stand D494 to see why TriMark is the leading global door solution provider offering **Global Reach, Global Support and Global Supply** of armoured vehicle access door systems.

Designed for you

The TriGuard line of TriMark's heavy duty hardware is specifically developed for heavy duty armoured vehicle applications.

Built for you

These robust door product/systems simplify vehicle/door mounting with reduced attachment points and door assembly.

Secured for you.

TriMark will be showcasing our latest armoured vehicle door systems, offering security, reliability and modularity, including our power assist COMMANDoor System and the popular V2 Heavy Duty Door Module.

For a full demonstration of TriMark products or to discuss your specific applications, please contact our sales team sales@trimarkeu.com to set-up an appointment. Alternatively, visit TriMark's exhibitor page and add to 'Favorites.' To learn more about our products, [click here](#)

TriMark has the experience

TriMark has been designing and manufacturing heavy duty hardware for over 35 years and has demonstrated the capability of our Armored Vehicle door and access products.

Engineering Resource Savings

TriMark's engineers can work with you to apply our door system expertise on your project to spec out a robust, semi-custom solution that meets your specifications. Additionally, a TriMark system requires fewer prints to be released into your system – saving you hours of internal design resources.

Supply Line Savings

A TriMark door hardware system includes a fraction of the part numbers that it would take to build a door with individual components. Fewer components mean savings in your sourcing, scheduling, ordering, logistics and inventory management activities. Simplify your supply chain with TriMark!

Assembly Savings and Throughput Improvement

When it comes to installing a TriMark modular system vs. individual components, the difference is dramatic. TriMark systems are delivered to you as pre-adjusted module(s) – saving you valuable resources on the assembly floor – this allows you to reduce your assembly labor and speed up your line to increase throughput.

Quality Improvement

When your door system is designed and manufactured by TriMark, you can expect a fully engineered solution that fits your needs, but it will also be designed to maximize performance and reliability by our experienced engineers that work on door systems every day. Additionally, you won't have the quality and rework problems associated with variation of components and having to dial in multiple adjustment points.
